Executive Summary

The Solvency and Financial Condition Report ('SFCR') is an annual public disclosure requirement under the Solvency II Directive. It presents material information on Evolution Holdings (Guernsey) Limited and subsidiaries ('the Group') business, performance, system of governance, risk profile, valuation for solvency purposes and capital management.

The principal trading company in the Group is Evolution Insurance Company Limited ('EICL', 'the Company') which specialises in niche insurance products including Surety Bonds, Latent Defects Insurance, and Legal Indemnity Products. In addition, EICL manages an in-force portfolio which includes UK and Greek Motor business.
The Group also includes Evolution Insurance Solutions Limited a UK insurance intermediary, and Skylark Investments Limited, a Guernsey investment holding company. Neither of these companies are considered material to the Group in terms of financial position or risk profile.

2020 has been an incredibly challenging year for business. For most of us, there has not been a worse time to be in business in our lifetimes. Trading conditions were already tough in 2019 but, as we entered 2020 the heat was turned up even more when COVID-19 entered Europe and the US.

Many of the usual rules have gone out of the window in the past 6 months as COVID-19 and Lockdown became 'a thing' and we continue to navigate uncharted waters in search of the 'new normal' in which a business for the future can be built.

Fortunately for our Group, and largely due to the hard work and dedication of my colleagues and our partners, Evolution Insurance Company Limited has been able to come out of the last 6 months stronger than when it entered them. We have been able to do this because for the 12 months preceding the arrival of the Coronavirus, the Group has been engaged in a program of de-risking the business. Giving notice to MGAs whose business models were no longer compatible with our own, revaluing claims reserves, revaluing assets and reducing costs, have all given the Group the financial strength it needed to weather the storm.

This has meant that although the Group has reported a loss of £4.9m (2019: profit £0.5m) for the financial year ending 30th June 2020 (our first loss in 17 years), our solvency capital requirement (SCR) cover ratio has improved and is now in line with the 140% ratio the Board has targeted. As at 30 June 2020, the Company reported own funds of £17.5m (2019: £18.6m) which are in excess of its SCR of £12.5m (2019: £15.0m). The Group excess funds are £5.4m (2019: £4.3m).

The Group has closely monitored developments connected with the spread of COVID-19 and has implemented operational and technology measures to ensure the safety and wellbeing of our colleagues, customers, and partners. The Boards of the Group are confident that the business model and financials have appropriately allowed for the risk and financial impact of COVID-19.

This excess of own funds is forecast to increase over the next 3 years as a result of focusing on underwriting, cost discipline and investment return. The Group continues to seek new business opportunities that will generate attractive returns to investors while maintaining sufficient own funds to meet our SCR plus a buffer to provide additional resilience to adverse events.

William Bidwell

A. Business & Performance

A1. Business

This report relates to Evolution Holdings (Guernsey) Limited ('EHGL') and its subsidiaries ('the Group), an insurance holding company licensed in Guernsey and limited by shares. Since Guernsey is not in the European Economic Area, nor is a Solvency II equivalent jurisdiction, Group supervision is carried out at the level of the insurance company

The principal trading Company of the Group is Evolution Insurance Company Limited ('EICL', 'the Company') which is 100% owned by EHGL. The other Group companies are:

- Evolution Insurance Solutions Limited ('EISL') a UK regulated insurance intermediary and 100% owned by EHGL; and
- Skylark Investments Limited ('SIL'), a Guernsey domiciled investment holding company, 87% owned by EICL.

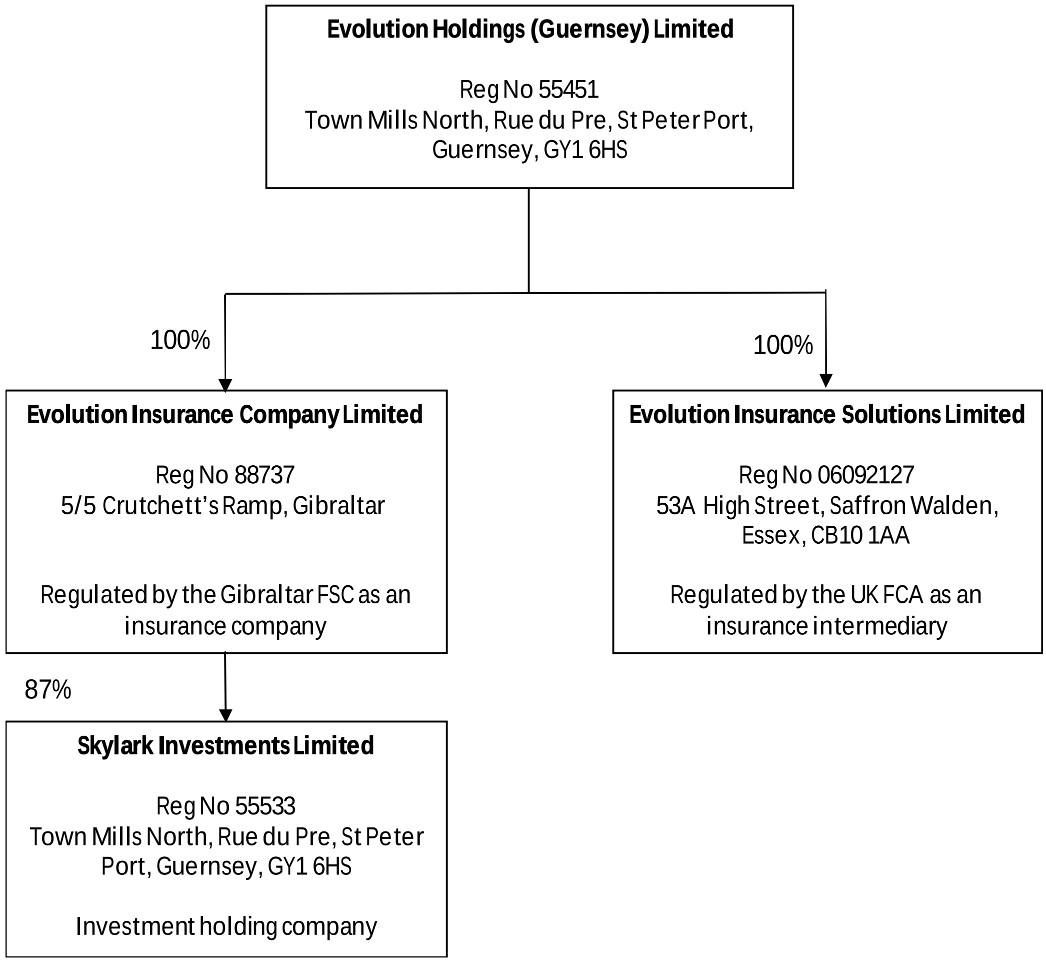
The EHGL shareholders, with qualifying holdings, are:

- Kenneth Acott
- Patrick Tilley
- William Bidwell

The table below summarises the domicile and purpose of each Group company.

Group Company	**Domicile**	**Purpose**
Evolution Holdings (Guernsey) Limited	Guernsey	A holding company which is parent to the other Group companies.
Evolution Insurance Company Limited	Gibraltar	A regulated insurance company which underwrites, inter alia, surety bonds, latent defects insurance ('LDI'), legal indemnity & title insurance in the UK and EEA jurisdictions (see below).
Evolution Insurance Solutions Limited	UK	A regulated insurance intermediary, EISL's main business is to sell surety bonds, primarily on behalf of EICL and to assist developers, builders, and receivers to access alternative warranties. It is also responsible for policy administration and claims handling (within authority limits) on behalf of EICL, and acts as EICL's agent for Insurance Premium Tax ('IPT').
Skylark Investments Limited	Guernsey	SIL is a subsidiary of EICL and holds some of EICL's property investments.

The Group structure is detailed in the following diagram.



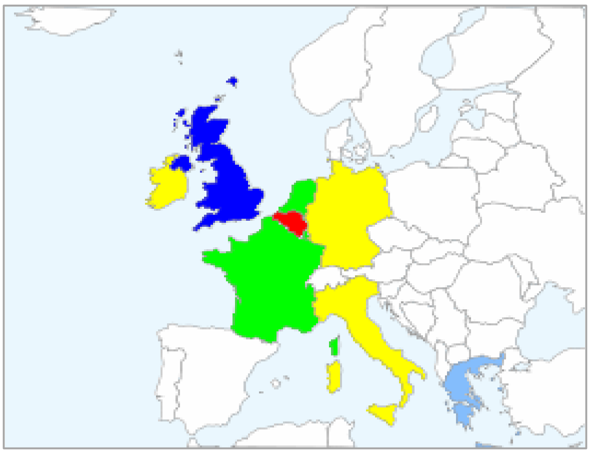
EICL and EISL are regulated as detailed below. EHGL and SIL are not regulated companies.

EICL Regulator	**EISL Regulator**
Gibraltar Financial Services Commission PO Box 940 Suite 3, Atlantic Suites Gibraltar Tel: +350 200 40283 www.fsc.gi	UK Financial Conduct Authority 12 Endeavour Square London E20 1JN Tel: +44 207 066 1000 www.fca.org.uk

The auditors for the Group companies are as follows:

EHGL and SIL	**EICL**	**EISL**
Grant Thornton Limited PO Box 313 Lefebvre House Lefebvre Street St Peter Port Guernsey. GY1 3TF Tel: +44 1481 753400 www.grantthorntonci.com	EY Limited PO Box 191 Regal House Queensway Gibraltar Tel: +350 200 13200 www.ey.com	Humphrey & Co Audit Services Ltd 7-9 The Avenue Eastbourne East Sussex BN21 3YA Tel: + 44 1323 730631 www.humph.co.uk

EICL is authorised to carry out business in the territories highlighted below. On 1 January 2021, following the expiry of the Brexit transition period, EICL will no longer be authorised to carry out business in any EEA territory and only authorised to write insurance business in the UK and Gibraltar.



Key

(blue)	Motor, Property, Liability, LDI, Warranty, IBG, Surety, Other
(yellow)	Property, Liability, Credit and/or Surety, Other
(green)	Property, Liability, Other
(red)	Property, Surety, Other
(light blue)	Motor

The Group's EU exposure has reduced significantly since 2018. At the end of the Brexit transition period on 31/12/2020, EICL will have 101 live EU policies, comprising 15 in Ireland and 86 in the Netherlands. These policies are latent defects and insurance-backed guarantee (IBG) policies, with relatively long durations.

The Group's other EU exposure is the Greek motor book which has been in run-off since 2018 but which will continue to run-off beyond 31/12/2020.

The Group has investigated the possibility of portfolio transfers but believes these would be challenging to execute and not necessarily in the best interest of customers. Accordingly, EICL wrote to relevant EU NCAs, including NCAs in Ireland, Greece, and the Netherlands, to outline the Group's intention to honour the policies and pay any valid claims as they fall due.

A2. Trading and Underwriting Performance

The principal trading activity of the Group is underwriting insurance business, and this is all performed within EICL. The performance for the last 2 years is set out in the following table.

£m	**EICL**		**Group**	
	2020	2019	2020	2019
Gross Written Premium (GWP)	9.8	23.4	9.8	23.4
Underwriting (Loss) / Profit	(3.6)	0.4	(2.9)	1.7
(Loss) / Profit After Tax	**(4.8)**	**0.3**	**(4.9)**	**0.5**

The GWP by class of business and jurisdiction for the years ending 30 June 2020 and 2019 is detailed in the following table.

		2020	2019
Class	**Jurisdiction**	**£'000**	**£'000**
Motor	UK	2	(22)
Motor	Greece	0	4,960
Property	France	0	188
Property	UK	238	0
Surety	UK	1,202	1,504
Surety	Italy	2	4
Legal	UK	(7)	177
Miscellaneous	UK	8,324	16,078
Miscellaneous	Ireland	(1)	72
Miscellaneous	Netherlands	0	46
Miscellaneous	Italy	31	348
Total	All	**9,791**	**23,355**

The fall in GWP is largely driven by the decision of the Group to de-risk the business and to give notice to MGAs whose business models are no longer compatible with the risk requirements of the Board. In addition to the de-risking of new business premium the Group has undertaken a robust review of reserves, especially in light of COVID-19, and this has resulted in a Group underwriting loss of £2.9m (2019: underwriting profit of £1.7m).

A3. Investment Performance

EHGL's investments are solely in Group companies and EISL had investments of less than £50,000 as at 30 June 2020 and 2019. SIL's investments in property are consolidated within the investments held by EICL.

EICL invests primarily in marketable, investment grade-rated, short, and intermediate-term securities and commercial property. The Investment Committee proactively manages the risk profile of the investments and works closely with independent investment consultants to ensure the portfolio meets the requirements of the Company.

The associated income and expenditure on these investments for the years ended 30 June is stated in the table below. The Property income includes a c. £800,000 adjustment to reflect a reduction in their value.

	2020		2019	
	Income	**Expenses**	**Income**	**Expenses**
Asset Class	**£'000**	**£'000**	£'000	£'000
Cash & Equivalents	116	2	91	3
Bond & Debt Instruments	531	145	277	140
Property	(187)	168	487	129
Equity	-	-	573	-
Total	**460**	**315**	**1,428**	**272**

A4. Any Other Information

The Group continues to monitor developments arising from COVID-19 and believes that the risks arising from the pandemic have been adequately considered in the Group's financial position as at 30 June 2020.

B. System of Governance

B1. General Information on System of Governance

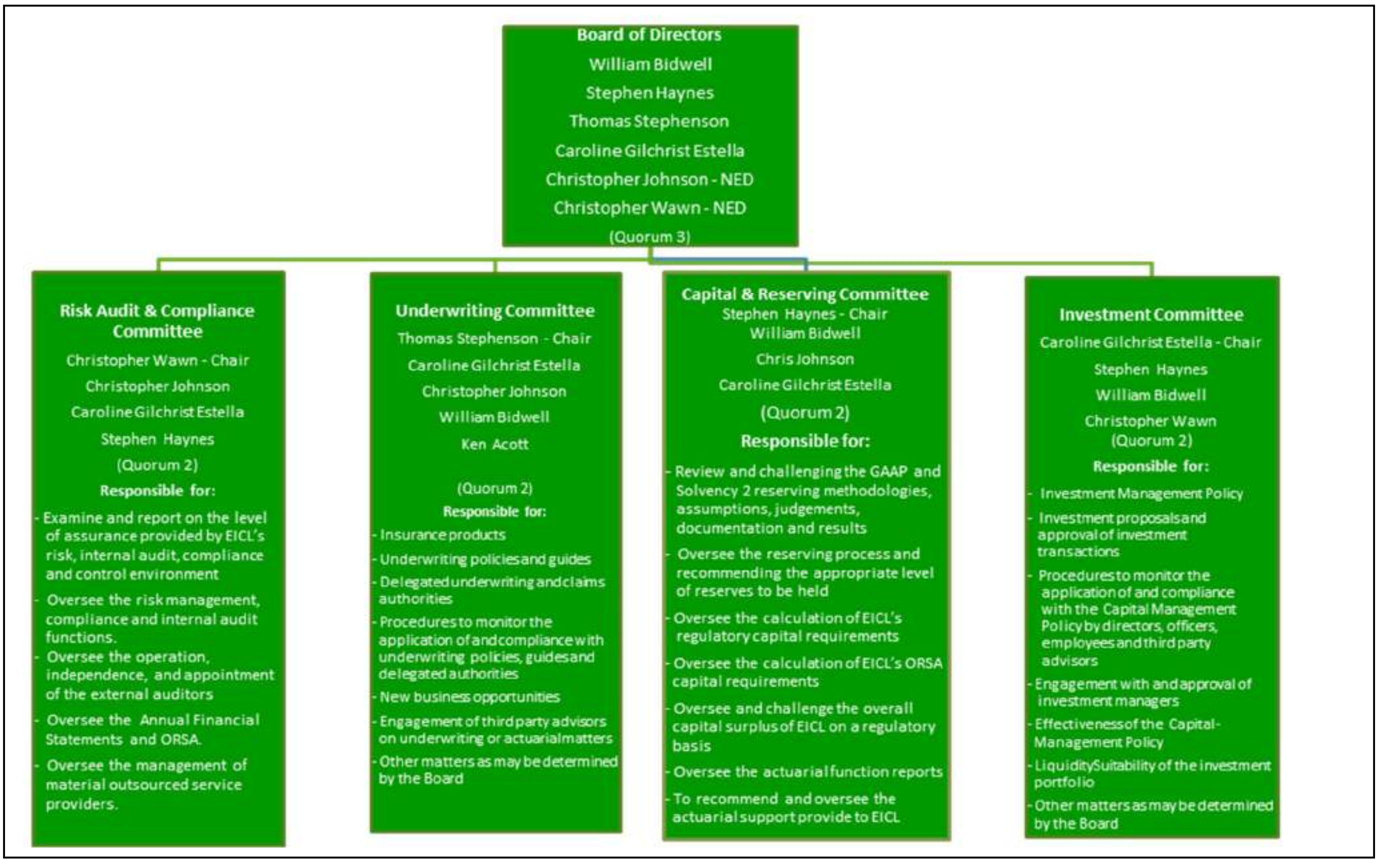
The Group is headed by the EHGL Board which retains ultimately accountability for the governance of the Group. The EHGL Board have delegated responsibility for the operation of the System of Governance to the Board of EICL. The EHGL Board retains a presence on all group company boards, through a "shareholder" director.

The governance framework implemented by the EICL Board, which applies to the Group, is based on the following principles:

- Governance drives a culture of accountability, delivering fair customer and investor outcomes.
- Governance is clear and transparent, principles based and pragmatic, and reflects the Group's and each company's nature, size, and scale.
- The governance framework helps the business run effectively, adds value to decision-making and supports the achievement of the Group's strategy.
- Governance is flexible and adaptive to change, cost efficient and effective.
- The governance approach meets and evidences regulatory requirements.

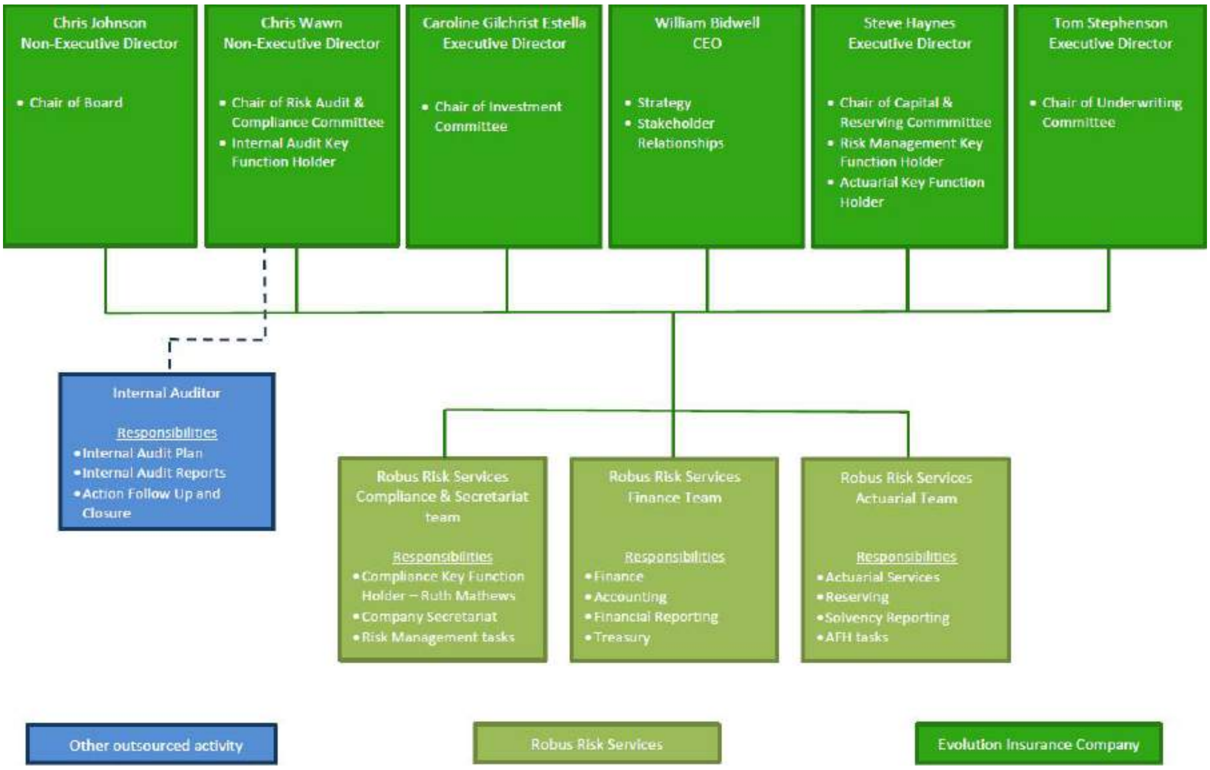
To lead and support the System of Governance, the following EICL Board and Committee structure has been approved by the EHGL Board.

Board and Committee Structure



Terms of Reference describe the purpose, responsibilities, membership, and authority delegated from the Board for each Committee. Relevant attendees are invited to Committees as determined by the Committee, for example the Company's investment consultant, River and Mercantile Solutions, attends each Investment Committee meeting.

The Roles and Responsibilities of the Directors are detailed below there were no changes during the year.



The Key Function Holders are as follows and are unchanged since the last SCFR.

Key Function	**Key Function Holder**
Compliance	Ruth Mathews
Risk	Stephen Haynes
Internal Audit	Chris Wawn
Actuarial Function	Stephen Haynes

The non-executive directors and the CEO are paid a fixed fee for their services which is benchmarked to standard market rates. One executive director is employed within the Group and paid on a fixed remuneration basis plus an annual bonus. The remaining two executive directors are remunerated by outsourced companies. There is a remuneration policy in place to ensure benchmarking is performed regularly. EICL has no employees.
Directors' remuneration is approved by the Board, or if it is inappropriate to discuss at board level, it will be discussed with and approved by shareholders. Directors abstain from discussion and decisions regarding their own remuneration to avoid conflicts of interest.

Non-Executive Director and CEO fees of £147k (2019: £147k) were paid during the reporting period.

B2. Fit and Proper Requirements

The Group and the Company recognise the value of fit and proper requirements and seek to ensure that directors, function holders and senior managers are able to perform their role effectively and in accordance with relevant business and regulatory requirements, and to manage EICL and the Group in a sound and prudent manner. Accordingly, all directors, key function holders and senior managers are required to meet the requirements set out in EICL's Fit and Proper Policy.

This policy requires that these individuals have:
- appropriate personal characteristics (including being honest and of good repute and integrity);
- the required level of competence, knowledge, and experience; and
- financial soundness.

The Group ensures that any individual employed, or applying to be employed, in such a position is assessed to confirm that they fulfil the fit and proper requirements. For new candidates this includes reviewing the CV of the candidate, an in-depth interview, obtaining references (both personal and professional), and the performance of due diligence checks. For existing staff, the relevant Board performs a regular assessment of impacted individuals and if necessary, seeks a personal attestation.

The Group also seeks to ensure that its Boards, as a whole, meet the Fit and Proper requirements by ensuring that collectively the Directors possess appropriate qualifications, experience, and knowledge about (at least) the following:
- Insurance and financial markets;
- Business strategy and model;
- Systems of governance;
- Financial and actuarial analysis;
- Regulatory frameworks and requirements; and
- Business Ethics

For EICL a review is led by the Chair of the Board.

B3. Risk Management System including ORSA

The EHGL Board is accountable for Risk Management, although in practice day to day responsibility is delegated to the Risk Management Function Holder for EICL.

Risk Management Roles and Responsibilities

The Boards of each Group company are ultimately responsible for ensuring the effectiveness of the risk management system, setting that company's risk appetite and approving risk management strategies and policies.

EICL has established a risk management framework which is used for the Group and applied to each subsidiary at a level proportionate to the complexity, nature, size of the business, whether it is subject to regulation, and the level of risk it presents to the Group.

The EICL Board delegates its risk management function to the Risk Management Key Function Holder and to the Risk, Audit & Compliance Committee ("RACC"). Should any risk management tasks be outsourced, the function holder is also responsible for the outsourced relationship, including monitoring the scope of work, service levels and for challenging the results. This individual is supported by the RACC in the execution of their role.

The key function holder and the RACC review, monitor and update as required, all the components of the risk management framework, engaging other Group and Company directors, key function, or key role holders, as necessary. This includes the Own Risk and Solvency Assessment process and the Risk Register.

EICL completes the Group solvency calculation and monitors Group solvency on behalf of EHGL and will liaise with the Group Board as necessary to ensure that the Group SCR is met and that risks to Group solvency are monitored and managed.

The Risk Management Process

The process of risk management is a continuous and systematic one, comprising 5 elements:

a) **Identification**. All Group directors ensure that risks are identified relating to their respective areas of responsibility, and in addition collectively identify risks to the overall business and Group. This includes risks outside the control of the Group.
b) **Assessment**. Only risks material to the Group are included in the Risk Register. Risks are assessed according to a matrix to evaluate their impact on the business if they materialised, and the probability of the risk materialising. The assessment is carried out on the risk with no mitigating controls in place ('gross' scores), and with mitigating controls in place ('net' scores). This assessment is then considered against the target or appetite score to determine any required changes in the level of risk or risk mitigation.
c) **Response**. All risks are dealt with as and when they arise, by the responsible director, EICL's RACC, the function holder, or the Board as appropriate. Decisions will be recorded on the Risk Register and detailed in the minutes of the relevant meeting.
d) **Monitoring**. The RACC reviews all items contained in the Risk Register at least quarterly. Risk controls on the Risk Register are incorporated into the Company's Compliance Monitoring Programme. Risks pertaining to a particular area of the business are regularly discussed with internal audit. The RACC and function holder also monitor the Company's adherence to stated risk appetites and tolerances.
e) **Reporting**. All directors will report risk events as and when they occur, and ensure they are considered at the appropriate meeting. They will ensure the Risk Register is updated with regard to impact and probability of the risk.

Risk Appetite and Tolerances

Risk Appetite is the nature and extent of the significant risks the Board is willing to take in achieving its strategic objectives; those risks that it wants to actively engage with. The risk appetite is typically a written statement with a target risk limit or trigger that will normally lie between the upper and lower risk tolerance limits.

Risk Tolerance limits are 'lines in the sand' beyond which the Group will not go without prior Board approval. It is not necessarily appropriate or possible to attribute a risk tolerance to all risks. The Board will consider the Group's material risks and choose those for which a risk tolerance will be relevant and meaningful for the business, and which can be measured and monitored. In doing this it will also consider the risks' net scores from the Risk Register.

The EICL Board has established a risk tolerance and a risk appetite in respect of regulatory solvency.

Own Risk Solvency Assessment ('ORSA' or 'the Assessment')

EICL is responsible for completing an ORSA for the Group, incorporating EHGL. The Group ORSA includes a solo ORSA on EICL, as the only insurance entity in the Group.

The ORSA is a fundamental part of the Group's capital management processes under the Risk Management Framework. The ORSA consists of processes that are designed to ensure those risks mitigated by holding capital are appropriately assessed, the capital requirements are understood on a forward looking basis and that this insight is used to inform decision making.

The ORSA is a judgement by the Board of these risks and their impact on the Group's solvency and is the Board's view, not the regulator's (and not the view using the regulatory formula) on the forecast level of excess own funds. At the same time, a forecast is also performed using the regulatory basis.

On an annual basis, an ORSA report is presented to the Board which consolidates the findings from these processes, which include business planning, stress testing and scenario analysis, including reverse stress testing and regular monitoring of the Group solvency position. If there is a material change in the risk profile of the Group, then an updated ORSA report may be produced.

The 2020 to 2023 ORSA report, produced in November 2020, includes the outcome of stress tests on the current and forecast balance sheet and risk profile of the Group. This demonstrates that on both an ORSA and regulatory basis the excess of own funds over the SCR increases steadily over the assessment period.

B4. Internal Control System

The Group's internal controls are part of its compliance framework, being the first line of defence in the 'three lines of defence' model the Group has implemented.

1. Business Operations - Internal Controls. The measures that are incorporated into systems and processes to control day-to-day activities. Appropriate controls and control indicators are implemented to ensure compliance and to highlight any significant breakdown in controls or inadequacy of process.
2. Oversight Functions. The Company's Committees and functions oversee internal controls, including drafting and implementing policies and procedures, and monitoring compliance with them. This second line of defence includes the compliance and risk management functions.
3. Independent Assurance Providers. This is primarily the Internal Audit function, although the appointment of External Auditors also provides independent assurance.

There is a risk-based compliance monitoring programme in place to provide assurance that EICL fulfils all its legislative and regulatory requirements and adheres to its policies and procedures. This is completed by the Compliance Function on a quarterly basis and forms part of the compliance report to the RACC.

Compliance Function

The Compliance key function holder is responsible for the completion of compliance tasks and has direct access to both the Board and the RACC.

The function is responsible for identifying and evaluating compliance risk, overseeing the implementation of controls for the risks identified, and monitoring their efficacy through the Compliance Monitoring Programme. Compliance reports are made to the Board at each meeting and advice provided to the business when requested. If any conflict of interest should arise, the function holder follows the Company's Conflicts of Interest Policy.

The Board supports the compliance function and shall make available such resource as is necessary and provide access to all relevant documentation and information from the business, for the Compliance Function to fulfil its aims.

B5. Internal Audit Function

The internal audit function considers the adequacy and effectiveness of the internal control system and other elements of the system of governance. It is objective and independent from the operational functions. These are regulatory requirements.

Internal audit performs an independent risk assessment and agrees what areas it will investigate with the RACC. It produces a report after each investigation describing its findings and its recommendations. This report is presented to the RACC, which ensures that appropriate actions are taken within an appropriate timescale. A summary of activity and investigation results, including progress towards implementing the recommendations, is provided to the RACC by the internal audit function.

The internal audit function has, from 1 January 2019, been provided by an outsourced professional services firm, following a formal tender process. By using an external firm as internal auditor, the RACC are of the view that internal audit is independent and objective. The external firm does not provide any additional services to the Group, and their independence, effectiveness, and re-engagement are reviewed annually by the RACC.

Audit Plan
The RACC approves the internal audit risk based three-year plan prepared by the appointed third party provider every year, reviewing and revising this in accordance with business priorities and risk areas, and with input from key stakeholders.

The plan is presented to the Board for approval. Should the plan significantly change for any reason during the year, it will be resubmitted to the Board for authorisation. Performance against the plan is monitored by the RACC and any significant deviations reported to the Board as required.

Audit Reporting
An audit report is prepared and issued by the appointed third party provider Internal Auditor following the conclusion of each audit, including any management responses, for review by the RACC. A log of all internal audit recommendations raised during individual audits are collated and the status of action points are monitored to completion by the RACC.

B6. Actuarial Function

EICL is the only insurance entity in the Group and therefore the only one for which it is relevant to have an Actuarial Function as set out in the SII Directive.

EICL's actuarial function is the responsibility of the key function holder, who reports directly to the Board. The actuarial function is responsible for:

- Coordination of the calculation of technical provisions;
- Ensuring the appropriateness of the methodologies and underlying models used as well as the assumptions made in the calculation of technical provisions;
- Assessing the sufficiency and quality of the data used in the calculation of technical provisions;
- Comparing best estimates against experience;
- Informing the Board of the reliability and adequacy of the calculation of technical provisions;
- Expressing an opinion on the overall underwriting policy;
- Expressing an opinion on the adequacy of reinsurance arrangements; and
- Contributing to the effective implementation of the risk-management system.

Each of these activities is undertaken at least annually and the outcomes reported to the Board.

B7. Outsourcing

Outsourcing is the use of a third party (either an affiliated entity within the same group or an external entity) to perform activities on a continuing basis that would normally be undertaken by the company. The third party to whom an activity is outsourced is a 'service provider'.

Outsourcing is considered where the Board believes that there is an advantage to the Company and its customers by using a service provider e.g. access to specialist resource, provision of services in the same jurisdiction as the customer, cost benefits. The Board remains fully accountable for any activity or function outsourced and must ensure that the Company does not outsource any activity which will unduly raise its exposure to operational risk, its ability to fulfil its obligations to customers or its regulator, nor impede effective supervision by its regulator.

Robust governance and management oversight over the outsourcing process, combined with assurance provided by regular management information, are essential controls for managing outsourcing risk and these are all included within the Company's outsourcing policy. The policy also requires the Board to consider contingency arrangements if a service provider should fail.

Outsourcing of critical or important operational functions or activities
EHGL and SIL are holding companies, neither of which have significant operational activity. Both companies' financial and operational management is outsourced to Robus Corporate Services (Guernsey) Limited.

EICL and EISL engage several suppliers to undertake important activities on their behalf. For each company, details of the activities and the jurisdictions they operate in are shown in the table below:

Critical Service Outsourced	Recipient Company	Jurisdiction
Underwriting, business acquisition, claims management, policy fulfilment & IPT compliance, for all lines of business, subject to delegated authorities	EICL	UK Greece
IT Help-desk and day-to-day support	EISL	UK
Insurance Management (compliance, risk management tasks, company secretarial, accounting, banking & investments, regulatory reporting, actuarial tasks)	EICL	Gibraltar
Internal Audit	EICL	UK
Professional Services – legal and tax	EICL EISL	UK, Gibraltar UK
Management Accounting and Payroll	EISL	UK

B8. Adequacy of the System of Governance

The Group continually monitors, assesses, and enhances its system of governance. There have been no significant findings during the reporting period which have indicated to the Board that the system of governance is not adequate. The Board also considers relevant industry advice and guidelines, for example the UK Financial Reporting Council's Corporate Governance Code, implementing these as appropriate for the size and complexity of the Group companies.

COVID-19 has resulted in restrictions on movement of people which has placed strain on the Group and its business partners in terms of business continuity. However, the Group places appropriate focus on business continuity planning and this focus has led to the operations continuing and there being little impact on policyholders or other key stakeholders.

C. Risk Profile

The risk profile of the Group is not considered to be materially different to that of EICL. As such the following risk profile assessment is based on that for EICL.

EICL faces risks spanning a range of categories including, but not limited, to those categories of risk that are encompassed by the Standard Formula and for which the holding of capital is considered an appropriate response. EICL maintains a Risk Register for recording these risks and considers these risks within the following categories:

Risk	**Risk Description**
Insurance / Underwriting	Insurance experience is different to current best-estimate assumptions.
Market	Adverse movement in asset values, asset income, interest rates or inflation.
Counterparty	A counterparty defaults on its obligations or fails to meet them on time.
Operational	Losses resulting from inadequate or failed internal processes, people, and systems or from external events.
Liquidity	The risk that EICL, though solvent, either does not have sufficient financial resources available to meet its obligations when they fall due or can secure them only at excessive cost.
Strategic (including Group & Reputational Risk)	Risks which can be quantified and understood, and which would have a major impact on the Group's business model and strategy. These could derive from either external or group events. The Group Risk component of strategy includes conflicts of interest, competition for financial resources, and the reputational impact from the activities of other parts of the group.

Liquidity Risk and Strategic Risk are not explicitly considered by the Standard Formula SCR but are included for completeness.

There have been no material changes in the material risks over the reporting period.

C1. Underwriting Risk

The nature of insurance business means that insurers are exposed to the possibility of claims arising on the business written. In underwriting insurance business EICL is therefore exposed to the following insurance risks:

Types of Insurance Risk	**Risk Description**
Premium or Pricing	The risk that the premium charged by the Company is inadequately priced or underwritten resulting in underwriting losses.
Reserving	The risk that the provisions / reserves established by the Company are not sufficient to meet the value of claims.
Catastrophe	The risk that there is a large loss arising from the insurance written.

The Company does not have a material exposure to Lapse risk (the risk that the rate at which policyholders cancel or do not renew their insurance is materially different to that assumed when the product is designed and priced).

Underwriting concentration risk is limited due to the spread of classes, jurisdictions, and distribution channels. Where there is a significant concentration, this is mitigated via reinsurance arrangements or underwriting limits placed on intermediaries.

There has been a steady reduction in the overall level of underwriting risk to which the Company is exposed as the UK and Greek motor books run-off and following the termination of many of the MGA new business arrangements. The Company's SCR is most sensitive to an adverse stress in Reserve Risk.

The means by which Underwriting risks are mitigated by the Company is set out below.

Premium Risk

EICL underwrites a mix of business that can broadly be split into 'retained' lines and 'fronted' lines.

Retained lines are distributed through intermediaries, the majority of which have underwriting authority delegated to them by EICL to allow them to bind business on behalf of the Company. This presents a risk in that the intermediary could underwrite outside of EICL's risk appetite, which is mitigated through robust controls, including:

- Delegated authority limits being specified in the contracts with the intermediary;
- Intermediaries being provided with pricing rates and underwriting guidelines which are regularly reviewed by the Underwriting Committee to ensure they are fit for purpose;
- Regular underwriting audits to review the procedures and controls of the intermediary and their compliance with the delegated authorities, pricing rates and underwriting guidelines.

Fronted lines are those where 100% of the underwriting risk is mitigated by the use of reinsurance, and therefore EICL retains no underwriting risk on these lines.

Reserve Risk

The Company uses the services of external professional actuaries to assist in the determination of the reserves that EICL holds. Additional mitigation is achieved through the following processes:

- the Capital and Reserving Committee reviewing claims reserves to ensure they are appropriate;
- delegated authority holders being regularly monitored to ensure they are adhering to the claim's management and reserving philosophy and guidelines; and
- internally assessing the data quality and methodology used to calculate the reserves.

Catastrophe Risk

The Company is exposed to catastrophic risks in relation to its retained lines, particularly the surety line of business since there are no non-proportional reinsurance treaties in place on this line of business. This risk is mitigated via the use of corporate counter indemnities and Directors' guarantees as security coupled with close oversight and monitoring of the intermediary and checking adherence to the delegated authority. Legal title also provides exposure to catastrophe risk and this is largely mitigated through the reinsurance arrangements EICL has in place.

C2. Market Risk

The Company is exposed to Market Risk through its financial assets and liabilities and its insurance assets and liabilities. The principal risk is that the proceeds from its financial assets are not sufficient to fund the obligations arising from the insurance or underwriting risk.

The main market risks which affect EICL are:

Types of Market Risk	Risk Description
Spread	Spread risk is the sensitivity of the values of investments, primarily bonds and secured loans in respect of the Company, to changes in the level or in the volatility of credit spreads.
Property	The risk that there is a fall in the value of the property assets owned by the Company or used to secure the value of loans made by the Company.
Concentration	Concentration exposure is assessed in respect to exposure to any single name.
Equity	The risk that there is a fall in the value of equities held by the Company.
Currency	Currency risk arises from change in the level or volatility of exchange rates.

The Company does not have a material exposure to Interest Rate risk (the risk that the fair value of interest rates adversely affects the value of assets or liabilities of the Company).

Prudent Person Principle
The Group and the Company are required to invest the assets used to cover the minimum capital requirement and the solvency capital requirement in accordance with the 'prudent person principle'. The prudent person principle defines that the assets must be invested in a manner that a 'prudent person' would (i.e. the decisions are generally accepted as being sound for the average person).

EICL considers the cash needed over a three-year horizon based on the business plan, considering the liquidity of the assets. The bond portfolio in particular is invested in short dated instruments which, along with the cash and cash equivalents held, are designed to approximate the nature and duration of the insurance liabilities. In addition, the Company is exposed to some medium to long term business for which the commercial property portfolio is considered a good investment to counter the long-term effects of inflation.

The Investment Committee is charged with the responsibility of measuring, reporting on, monitoring of, control and managing the performance of all EICL's investable assets. This includes assessment of the prudent person principle.

The Investment Committee has engaged the services of external experts to assist with its responsibilities and the Board has issued terms of reference that impose limits and controls on the quality, liquidity, asset class, nature, duration and security of investments and investment assets.

The risk management actions employed to manage the individual risks are discussed below.

Spread
As credit spreads will typically be narrower for well rated securities than for poorly rated securities (and for short duration rather than long duration securities), the Company specifies credit quality limits to the conventional fixed income assets in its Investment Policy.

The Investment Management Procedures and Policy are reviewed at least annually to ensure that the mitigating guidelines in place are still appropriate for the Company and the risk environment in which it operates. There has been no material change in spread risk over the reporting period.

Property

EICL has a property investment portfolio, the majority of which consists of commercial properties which are then leased to provide a return on capital. Given the tenant covenants in place, these commercial properties are not subject to the same market fluctuations as residential properties, and therefore are considered to be lower risk. The properties, while all based in the UK, are geographically spread to mitigate concentration risk.

The material risks presented by the property portfolio have not significantly changed over the reporting period. The Investment Committee assesses and monitors the risks presented by the property portfolio,

Concentration

The concentration exposure arises in respect of positions taken in the Company's bond portfolio, secured loans, property and loan exposure and counterparties in respect of its cash holdings and reinsurance recoveries. In respect to properties and loans, concentration exposure is considered where the individual properties are part of the same building or the same property holding company. Concentration of counterparties in respect of cash and reinsurance exposures is considered with counterparty risk in section C3.

Concentration risk in the bond portfolio is mitigated by the use of external investment manager. Concentration risk on property acquisitions is easier to control since the concentration exposure is considered as part of the due diligence on acquisition. Ongoing monitoring of the concentration risk is undertaken by the Investment Committee which monitors investment holdings against the Investment Management Policy and Procedures, which are reviewed at least annually to ensure that the mitigating guidelines in place are still appropriate for the Company and the risk environment in which it operates.

Concentration risk has remained relatively consistent over the reporting period and EICL's risk profile is most sensitive to a fall in the value of commercial property.

Currency

The Company is exposed to two currencies, the Euro ("EUR") and British Sterling ("GBP"). All investments are held in GBP and therefore present no currency risk to the Company. The Company holds a Euro cash account for Euro premium funds and claims payments, to minimise the number of currency exchanges necessary, however it is exposed to currency risk as its accounting currency is GBP and the exchange rate will affect the value of transactions and balances.

The Investment Committee regularly consider currency exposure and make recommendations to the Board when appropriate. The level of currency risk has reduced over the reporting period and is not material to the Group..

C3. Counterparty Risk

Counterparty risk (sometimes referred to as credit risk) is the risk that a counterparty will be unable to pay amounts in full when due.

EICL is principally exposed to Counterparty risk in the following areas:

- Counterparty exposure to reinsurers;
- Amounts due from insurance contract holders;
- Amounts due from insurance intermediaries; and
- Amounts held with banks and other financial institutions

The Underwriting Committee assesses the counterparty risk by reviewing the reinsurers share of insurance liabilities and amounts overdue from the other insurance counterparties listed above (including how long overdue they are) at each Committee meeting. It monitors these amounts and whether they are in line with EICL's risk appetite, implementing additional risk mitigation measures or escalating to the Board if the risk appetite is exceeded. The Investment Committee considers the counterparty risk to banks and other financial institutions.

Counterparty risk presented by reinsurers is mitigated by:

- using 'A' rated reinsurers or better wherever possible;
- monitoring the credit rating of current and historic rated reinsurers;
- for non-rated reinsurers alternative mitigation measures are implemented, such as 'pay as paid' clauses in the contract or collateralised arrangements via 'funds withheld' accounts;
- using a select number of reinsurers (reducing contagion risk).

As at 30 June 2020, the largest exposure to a single reinsurer (net of collateral) amounted to 39% (2019: 38%) of the net exposures. This exposure is with an A rated counterparty.

Counterparty risk relating to insurance contract holders and insurance intermediaries is mitigated by:

- performing due diligence on the financial stability of counterparties prior to entering into business relationships, and ongoing monitoring of same;
- some insurance intermediaries being connected parties;
- ensuring payment terms are included in business contracts; and
- requiring payment of premium in advance wherever possible.

Counterparty risk is also identified, assessed, and monitored through the Risk Register on which key market risks are recorded.

The risk mitigation measures outlined above are reviewed at least annually by the Underwriting and/or Investment Committee to ensure that they are still effective and appropriate for the Company and the risk environment in which it operates.

C4. Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people, and systems, or from external events.

EHGL and SIL are exposed to low levels of operational risk, being holding companies, as they outsource operational functions to RCS (Guernsey). The majority of the operational risk in EISL is considered in assessing EICL's operational risk as its activity primarily relates to sourcing Surety business for the Company.

EICL's operational risk is identified, assessed, and monitored by the RACC with oversight from the Board, and recorded on the Risk Register. Mitigating measures are also recorded on the Risk Register and are monitored on a risk-based frequency. The most material categories of operational risk and how they are mitigated are set out below.

There have been no material changes to the operational risks the Company is exposed to over the reporting period. The Company's solvency is not sensitive to operational risk stresses.

Outsourcing risk

This is the risk that a material service provider fails to meet its contractual obligations or goes into liquidation and is mitigated by the following key controls:

- contracts must be in place with all material service providers
- appropriate risk assessment and due diligence must be conducted before entering into a new outsourcing arrangement
- at regular intervals, a service providers' stability and performance are monitored and measured against agreed service levels

Regulatory & Legal risk

This is the risk that EICL and/or the Group breaches a regulatory or legal requirement resulting in a fine, sanction, and/or restriction/revocation of its licence.

This risk is mitigated by having sound corporate governance and internal controls, and a strong compliance culture. Internal controls are regularly assessed through the compliance monitoring programme and are also subject to internal audit. In addition, the Company has regular meetings with its Regulator and closely monitors legal developments in the jurisdictions in which it operates.

Financial crime risk

This is the risk that EICL is used as a vehicle for financial crime, e.g. money laundering, or suffers directly from financial crime e.g. is defrauded by a customer, employee or intermediary. Increased claims costs because of fraudulent claims effects EICL's profitability and potentially its solvency.

This risk is largely mitigated by having robust internal controls and corporate governance, including adhering to the 'four-eyes principle'. Internal controls are regularly monitored through the compliance monitoring programme and are also subject to internal audit.

External risk

This is the risk that an external event affects the operation of the Company or one (or more) of its material outsourced providers.

The risk is mitigated by the Company having a tested Business Continuity Plan ('BCP') and requiring such a tested BCP to be operated by its material service providers.

C5. Liquidity Risk

This is the risk that cash may not be available to pay obligations when due at a reasonable cost. EHGL, EISL, and SIL have no material exposure to liquidity risk.

EICL manages its assets in such a manner to ensure an adequate proportion of available funds is available to meet its expected and stressed cash outflows.

Liquidity risk is assessed and monitored by RRS on behalf of EICL on a day-to-day basis, ensuring that there are sufficient funds available to meet both immediate and foreseeable cash flow requirements. This is done by reviewing balances in bank accounts and investments against expected requirements, bearing in mind maturities of investments and notice periods for withdrawals. Investments and cash are reviewed by the Board quarterly. The Investment Committee haven also set guidelines for the management of liquidity in the Investment Management Policy, which is reviewed at least annually to ensure that the mitigating guidelines in place are still appropriate for the Company and the risk environment in which it operates.

The property portfolio presents the greatest liquidity risk to the Company as property is likely to take some time to sell and a forced sale may result in a reduced return. This is mitigated by the Investment Committee adhering to the Investment Management Policy, and monitoring liquidity risk.

C6. Strategic Risk

Strategic risks are those that arise from the fundamental decisions that the Board take concerning the Group's objectives. Essentially, strategic risks are the risks of failing to achieve these business objectives. This includes Group risk which is the risk that adverse events or circumstances affecting one part of the Group damage the solvency, liquidity, results, or reputation of the other companies in the Group.

The risk is not considered material and is mitigated by the governance and risk management frameworks operating in the Group. Brexit has been assessed as a strategic risk and the actions taken by the Group to mitigate this risk are detailed in section A1.

C7. COVID-19

A number of key risks have been identified which arise from the COVID-19 pandemic notably around the likely impact on operations, future sales volume, claims experience, and investment volatility. The main risks and the key scenario modelled are:

Key Risk	Key Scenario Modelled
Operations	- Impact of key partner failure
Sales volumes	- Impact of decreases in volumes on liquidity
Claims experience	- Impact of severe economic downturn - Impact of COVID-19 driven increase in claims
Investment volatility	- Impact of sudden and / or prolonged falls in the value of the investments held by the Company

The scenarios modelled have been particularly severe and the results show that the Company is well placed to manage these risks.

D. Valuation for Solvency Purposes

The Technical Provisions held by the Company and Group are not materially different. The Group assets are £0.5m (2019: £0.6m) higher than those in EICL and all restatements are made following the same methodology as for the Company. Accordingly, the information in this section relates to EICL.

D1. Assets

As at 30 June 2020, the Company held the following assets:

Asset Class	GAAP Accounts Value (£'000)	Reclassification for Solvency purposes (£'000)	Solvency Valuation Adjustment (£'000)	Solvency Value (£'000)	Note
Investments in properties	7,670	-	-	7,670	1
Equity, including investment in group undertaking	2,106	-	-	2,106	2
Reinsurer's share of unearned premiums	-	-	-	-	3
Reinsurer's share of claims outstanding	60,019	(2,791)	1,768	58,996	4
Debtors arising out of insurance operations	3,135	(3,135)	-	-	5
Deferred acquisition costs	2,300		(2,300)	-	6
Other Assets and Prepayments	482	2,019	(11)	2,490	7
Cash and cash equivalents	10,778	(1,231)		9,547	8
Deposits other than cash equivalents	-	-	-	-	8
Collective investment undertakings	15,729	(9,182)		6,547	8
Financial investments - corporate bonds	13,972	(4,669)	-	9,303	9
Financial investments - other loans	4,980	154		5,134	9
Deferred taxation	51		222	273	10
TOTAL	**121,222**	**(18,835)**	**(321)**	**102,066**	

As at 30 June 2019, the Company held the following assets:

Asset Class	**GAAP Accounts Value (£'000)**	**Reclassification for Solvency purposes (£'000)**	**Solvency Valuation Adjustment (£'000)**	**Solvency Value (£'000)**	**Note**
Investments in properties	8,466	(405)	-	8,061	1
Equity, including investment in group undertaking	2,106	-	-	2,106	2
Reinsurer's share of unearned premiums	1,107	-	(1,107)	-	3
Reinsurer's share of claims outstanding	100,286	2,752	2,080	105,118	4
Debtors arising out of insurance operations	6,125	(6,125)	-	-	5
Deferred acquisition costs	3,509	-	(3,509)	-	6
Other Assets	501	1,868	(29)	2,340	7
Cash and cash equivalents	9,321	(1,414)	-	7,907	8
Deposits other than cash equivalents	1,303	714	-	2,017	8
Collective investment undertakings	21,602	(15,101)	-	6,501	8
Financial investments - corporate bonds	15,320	(5,702)	-	9,618	9
Financial investments - other loans	5,208	501	-	5,709	9
Deferred taxation	51	-	631	682	10
TOTAL	**174,903**	**(22,912)**	**(1,934)**	**150,058**	

Reclassifications for solvency purposes are reclassifications to the technical provisions, whereas solvency valuation adjustments are valuation differences applied on a line-by-line basis.

Supporting Notes

The valuation principles applied to these assets are consistent with those used in the GAAP accounts.

1. Investments in property – these are valued based on the most recent external valuation report, or cost if the acquisition was less than three years ago. Properties are valued at least every three years. The solvency value also includes SIL equity.
2. The Company has made no adjustments to the GAAP accounts valuation.
3. Reinsurance share of unearned premiums – the reinsurance share of unearned premiums is not recognised for solvency purposes.
4. Reinsurance share of claims provisions – The adjustments made to its reinsurance recoveries in its GAAP accounts in recording the reinsurance share of claims provisions for solvency purposes are set out in section D2, including items such as discounting ENIDs, and defaults.
5. Debtors arising out of insurance operations – valued based on the best estimate of the recoverable value, discounted to present value where the expected recovery is greater than one year. Reclassified for solvency purposes to net off technical provisions.
6. Prepayments and deferred acquisition costs – GAAP value based on the estimated unutilised benefit as at the balance sheet date. These are disallowed for solvency purposes.
7. Other assets – valued based on the best estimate of the recoverable or realisable value. Adjustments for solvency purposes include the look through to reclassify long term loans and a reclassification of accrued interest arising on bonds and secured loans.
8. Cash and equivalents; deposits other than cash equivalents; and collective investment undertakings – valued at the amount held at the period end, translated using the year end exchange rate where appropriate. Amounts are reclassified to technical provisions where they relate to collateral arrangements.
9. Financial investments – all of the financial investments for the company have been looked through to identify the underlying exposures or reclassified to technical provisions where they relate to collateral arrangements.
10. Deferred tax asset – the revaluation is based on the expected tax benefit once the valuation adjustments to transition to solvency valuations unwind.

D2. Technical Provisions

Technical Provisions measure the value of EICL policies and are comprised of two main calculations:

- the Best Estimate of Liabilities (BEL) which is the Company's realistic assessment of every policy's future cash flows while it remains active over the life of the contract; and
- the Risk Margin which represents the estimated cost of the capital a third-party insurer would be required to hold to support the Company's insurance business over its period of run-off.

The technical provisions by line of business are as follows:

	As at 30 June 2020			As at 30 June 2019		
Line of business	Best Estimate of Liabilities (£'000)	Risk margin (£'000)	Technical provisions (£'000)	Best Estimate of Liabilities (£'000)	Risk margin (£'000)	Technical provisions (£'000)
Motor vehicle liability including PPOs	62,256	721	62,977	97,155	1,352	98,507
Fire & damage to property	1,690	217	1,907	11,884	32	11,916
Credit and suretyship	1,575	202	1,777	1,305	225	1,530
Legal expenses	26	3	29	(5)	(1)	(6)
Assistance	-	-	-	61	-	61
Miscellaneous financial loss	13,929	1,545	15,474	9,605	992	10,597
Total	**79,476**	**2,688**	**82,164**	**120,005**	**2,600**	**122,605**

Note: Negative technical provisions arise where future premiums exceed provisions for claims.

Areas of Uncertainty in Technical Provisions

In calculating the Technical Provisions there are a number of areas where informed or expert judgement is required. The key areas of uncertainty around the calculation of technical provisions are:

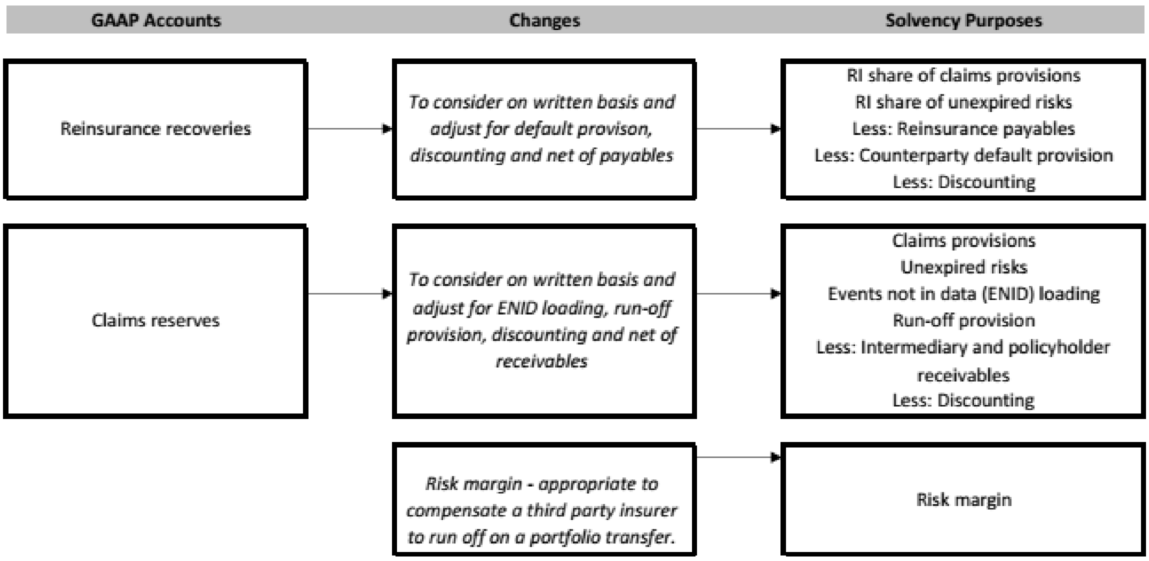
a. Estimation of outstanding loss reserves ("OSLR") – while information about claims is generally available, assessing the cost of settling the claim is subject to some uncertainty.
b. Estimation of the losses relating to claims which have been incurred but not reported ("IBNR") – this is subject to a greater degree of uncertainty than estimating the OSLR since the nature of the claims is not known at the time of calculating the technical provision.
c. Estimation of claims arising on business which has not yet expired ("unexpired risks") – this is uncertain as the claims have not yet been incurred but are expected to be incurred on the business where the Company has written premium but this has not yet been earned.
d. Market environment – changes in the market environment increase the inherent uncertainty affecting the business, for example claims inflation, propensity for UK motor claims to settle through periodic payment orders ("PPOs"), and changes in the personal injury discount rate ("Ogden rate").
e. Events not in data ('ENID loading') – estimating a provision for events not in data is subject to considerable uncertainty as the events being reserved have not been observed.
f. Provision for expenses – estimating a provision for expenses required to run-off bound obligations of the Company taking into account new business is uncertain due to the estimations around the period of the run-off, base costs, forecast levels of new business and inflation.
g. Risk margin – is uncertain due to the requirement to forecast future solvency capital requirements over the period of a run off. This therefore shares the uncertainties of the runoff provision, as well as the inherent uncertainties around forecasting future solvency capital requirements.

The Company manages the risks around these uncertainties through the following actions:

- Ongoing monitoring of claims, including regular reviews of claims handling functions.
- Maintaining reinsurance arrangements to limit the impact of adverse claims development.
- Internal controls through the underwriting committee and actuarial function which monitor claims development and reinsurance arrangements.
- Regular internal and external actuarial reviews.

Reconciling GAAP Reserves to Technical Provisions

The changes required to transition from Claims Reserves in the EICL Financial Statements (GAAP Reserves) to the Technical Provisions for solvency purposes are consistent for all lines of business, and can be summarised as follows:



The detailed adjustments made by the Company to transition balances from GAAP reserves to solvency Technical Provisions are set out below. The Company has not applied the matching adjustment, volatility adjustment, transitional risk-free interest term structure or the transitional deduction in calculating its technical provisions.

1. Claims provisions – The Company has made the following adjustments to its claims provisions in its GAAP accounts in recording the claims provisions for solvency purposes:
   - removed prudent management margins of £392k (2019: £nil) as solvency II requires technical provisions to be established on a best estimate basis; and
   - removed an unexpired risk reserve of £782k (2019: £nil) as this value is included in the calculation of the Premium provision for solvency purposes.

   The Company has considered whether adjustments may be required as a result of contract boundaries and believes there are no such adjustments required.

   The claims provisions as at 30 June 2020 were £68,219k (2019: £108,445k).

2. Reinsurance share of claims provisions – The Company has made no adjustments to its reinsurance recoveries in its GAAP accounts in recording the reinsurance share of claims provisions for solvency purposes other than those described.

   The reinsurance share of claims provisions as at 30 June 2020 was £60,084k (2019: £100,569).

3. Premium provisions / Unexpired risks – The Company has estimated the claims which will be payable on unexpired risks (sometimes termed ‘premium provisions’) based on the ultimate loss ratios and large loss experience from the claims provisions.

   The premiums provision as at 30 June 2020 was £5,425k (2019: £6,178k).

4. Reinsurance share of premium provisions – The Company has estimated the amounts recoverable on premium provisions based on the ultimate loss ratios and large loss experience from the claims provisions.

   The reinsurance share of premium provisions as at 30 June 2020 was £nil (2019: £542k).

5. Intermediary and policyholder payables/receivables are netted off the technical provisions for solvency purposes. There are no valuation differences between GAAP accounts and intermediary and policyholder payables/receivables for solvency purposes.

   The net insurance payables as at 30 June 2020 was £876k (2019: receivable £1,850k).

6. Reinsurance payables/receivables are netted off the reinsurance recoveries for solvency purposes. There are no valuation differences between GAAP Accounts and net reinsurance payables/receivables for solvency purposes.

   The net reinsurance payables as at 30 June 2020 was £2,791k (2019: receivable £2,752k).

7. Events not in data – Technical provisions for solvency purposes are required to allow for all possible events, including those that may not have been historically realised before. Such events not presented in a set of observable historical loss data are often called events not in data (“ENID”). This is a difference in valuation methodology compared to the GAAP accounts which consider prudent estimates which can be reasonably foreseen, and therefore leads to a loading on the technical provisions to consider the probability weighted effect of events which have not previously been observed.
   The Company has undertaken an assessment of previously unobserved events for each line of business and sought to consider the probability weighted effect of such events and given the business model, believe that such unobserved events are unlikely.

   As such, the net ENID loading applied by the as at 30 June 2020 was £239k (2019: £163k).

8. Counterparty default provision – The Company has considered a provision for default by one or more of its reinsurance providers. The provision is based on the total exposure to the counterparty, the rating of the counterparty and the existence of any collateral arrangements with the counterparty. The Company estimates the counterparty default provision and consider each of the exposures, net of collateral arrangements in existence, apply the estimated probability of default by rating, and derive a weighted average probability of default.

   As at 30 June 2020. the Company has calculated the weighted average probability of default of reinsurers to be 0.05% (2019: 0.13%), and the resultant counterparty default adjustment was £39k (2019: £160k). The reduction in the adjustment was driven by an increase in the collateral held in respect of unrated reinsurance exposures.

9. Expense provision – Technical provisions for solvency purposes are required to take account of all expenses that will be incurred in servicing insurance obligations. This is commonly referred to as an expense or run-off provision as it therefore considers all future expenses which would be incurred to allow the existing obligations to run-off.

   The provision applied by the Company as at 30 June 20209 was £3,031k (2019: £6,041k) with the decrease due to an improvement in the basis by which expenses are allocated to the current insurance obligations and a reduction in the actual level of expense being incurred.

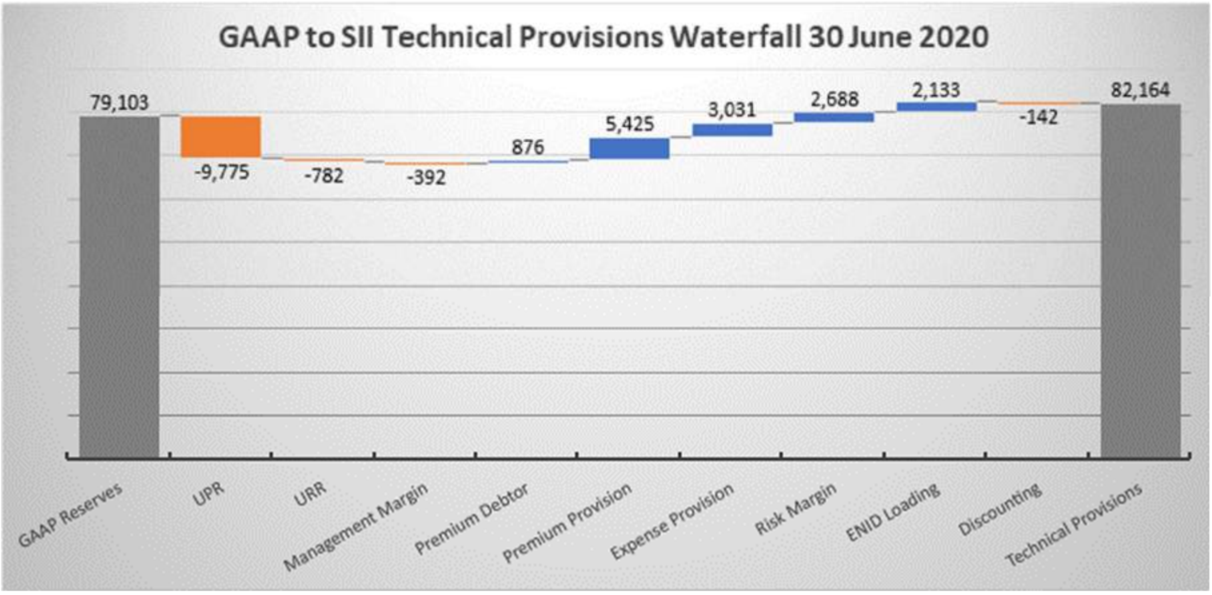
10. Discounting – Discounting has been applied in the technical provisions based on the sterling yield curve as at 30 June 2020 as issued by the European Insurance and Occupational Pensions Authority ("EIOPA").

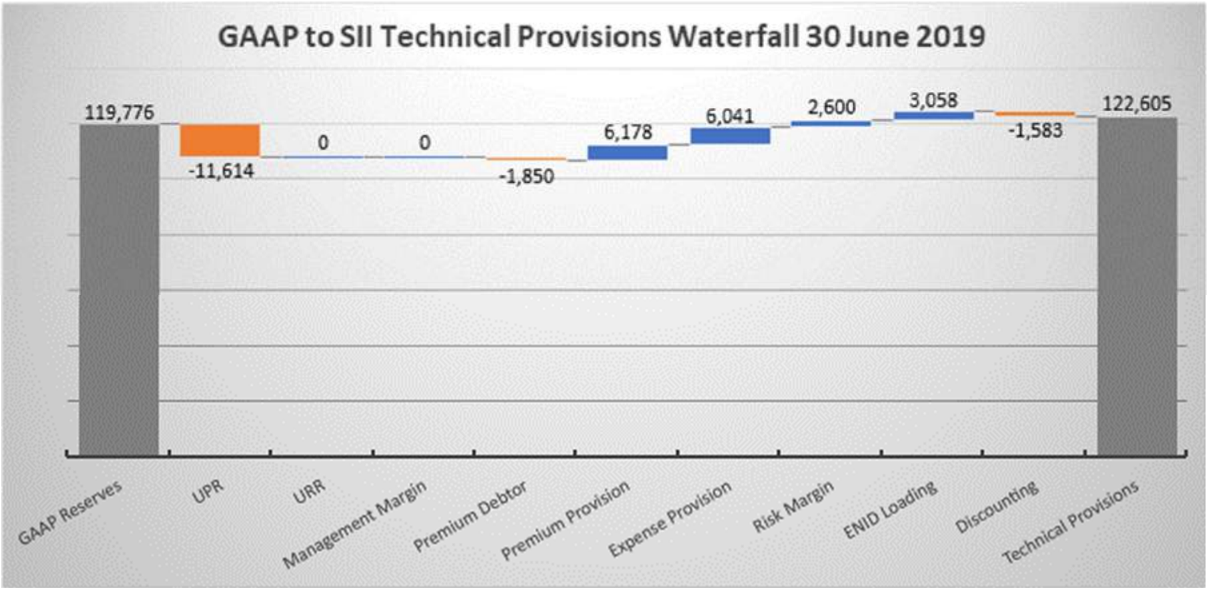
    The impact of discounting on the gross technical provisions was £207k (2019: £1,867k), and on the reinsurance share of technical provisions the impact of discounting was £151k (2019: £1,481k). These differ to the figures in the waterfalls below as the GAAP figures already include the PPO related discounting.

11. Risk Margin – The risk margin has been considered to ensure that the value of the technical provisions is equivalent to the amount that would be expected to have to be paid to a third party insurance company in order to take over and meet the insurance obligations of the Company. The risk margin has been calculated based on the estimated capital requirements to run off the Company's obligations and applying a cost of capital of 6%.
    The capital required to run-off the portfolio is based on the future estimated SCRs, taking account of operational, underwriting risk and reinsurance counterparty risk.

    This results in a risk margin as at 30 June 2020 of £2,688k (2019: £2,582k).

For the years ended 30 June 2020 and 2019, the reconciliation adjustments detailed above are summarised in the following charts.





Reinsurance Arrangements by Line of Business

The Company has entered into various reinsurance arrangements, as follows, for each line of business:

- Motor vehicle liability and other motor insurance – The Company caps its underwriting risk at £500,000 for UK policies and €500,000 for Greek policies via non-proportional ("XoL") treaties. The panel of reinsurers in the XoL treaties are predominately counterparties with good ratings from a well-known rating agency. The Company also has a stop-loss arrangement in place which caps the maximum loss across the whole UK motor book in each six month period. In respect of the UK motor business, the company also has a proportional ("QS") treaty for which the company holds collateral via a fund withheld arrangement. In respect of its Greek motor business, the company has a QS treaty with a counterparty with a good rating from a well-known rating agency.
- Fire and other damage to property – There are no reinsurance arrangements for this line of business.
- Credit and suretyship – There are no reinsurance arrangements for this line of business.
- Miscellaneous financial loss – The Company has QS reinsurance arrangements for two books of business written in this line of business. One arrangement is with an unrated reinsurer but with collateral arrangements in place and the other is with a rated reinsurer. However, the majority of books are not subject to reinsurance.

D3. Other Liabilities

The Company recorded the following classes of liabilities for solvency purposes:

	As at 30 June 2020		As at 30 June 2019		
Liability (£'000)	**GAAP Value**	**Solvency Value**	**GAAP Value**	**Solvency Value**	**Explanation of Differences**
Reinsurance share of deferred acquisition costs	-	-	448	-	• Not recognised for solvency purposes
Accruals	310	310	310	310	• None
Reinsurance accounts payable	17,856	-	20,022	-	• Reclassified to technical provisions
Other creditors	4,018	2,114	9,606	8,539	• Reclassified to technical provisions

There have been no valuation adjustments for solvency purposes other than the non-recognition of reinsurance share of deferred acquisition costs.

D4. Alternative Methods for Valuation

Not applicable for the Company.

D5. Any Other Information

The impact from COVID-19 as at the date of this report has not caused a material decline in the Group's solvency.

E. Capital Management

The Capital Management section of the report describes the objectives and approach that the Group takes in managing its capital position. The capital position is measured by assessing the structure, quality and level of Own Funds and the calculation of the Solvency Capital Requirement ('SCR') and Minimum Capital Requirement ('MCR') under the Standard Formula.

When managing capital, the Group has the following additional objectives:

- To ensure the Group's strategy can be implemented and is sustainable;
- To ensure the Group's financial strength and to support the risks it takes on as part of its business;
- To give confidence to policyholders and other stakeholders who have relationships with the Group; and
- To comply with Solvency II capital requirements imposed by its regulator, the Gibraltar Financial Services Commission (GFSC).

These objectives are reviewed at least annually, and risk metrics are set by which to judge the adequacy of the Group's capital. The capital position is monitored against these metrics to ensure that sufficient capital is available to the Group. The Group is required to hold sufficient capital to meet the Solvency II capital requirements based on the higher of the SCR or MCR.

The Group intends to maintain Own Funds in excess of the SCR and MCR to meet the GFSC's regulatory requirements and to maintain an appropriate additional margin over this to absorb changes in both capital and capital requirements (an 'SCR Buffer'). The level of the SCR Buffer is determined by the EICL Board and depends on various actuarial and other assumptions about potential changes in market prices, future operating experience and the actions management would take in the event of particular adverse changes in market conditions.

As at 30 June 2020 the Company reported an excess of Own Funds over the SCR of £5.0m or 140% (30 June 2019: £3.6m or 124%); in line with the Board's target buffer of 140%. The corresponding Group excess was £5.4m or 143% (2019: £4.3m or 129%).

E1. Own Funds

The Company classifies its own funds as tier 1, tier 2 or tier 3 depending on the characteristics of the capital. Tier 1 capital is the best form of capital for the purposes of absorbing losses. The Company's available own funds are as follows:

		As at 30 June 2020		As at 30 June 2019	
Own fund item	**Tier**	**£'000**	**%**	**£'000**	**%**
Ordinary share capital	1	500	3%	500	2%
Preference share capital and share premium	1	5,121	29%	5,121	27%
Reconciliation reserve	1	11,585	66%	12,301	66%
Deferred tax asset	3	273	2%	682	4%
		17,479	**100%**	**18,604**	**100%**

The reconciliation reserve represents retained earnings and reconciliation adjustments from the GAAP balance sheet to the SII balance sheet.

The movement in Own Funds during the year ended 30 June 2020 was as follows:

	£'000	£'000
Own funds as at 30 June 2019		**18,604**
Accounting loss for the year	**(4,805)**	
Solvency II valuation adjustments:		
Add: decrease in disallowable assets	18	
Less: decrease in premium provisions and other adjustments to technical provisions	1,433	
Add: decrease in counterparty default provision	121	
Add: change in risk margin, ENIDs and run-off provision	2,847	
less: decrease in deferred tax assets	(409)	
Other movements (including discounting of reserves)	(329)	
Solvency II loss for the year		**(1,125)**
Own funds as at 30 June 2020		**17,479**

The Group's available Own Funds are as follows:

		As at 30 June 2020		As at 30 June 2019	
Own fund item	**Tier**	**£'000**	**£'000**	**£'000**	**%**
Share capital and share premium	1	125	1%	125	1%
Preference share	1	-	0%	-	0%
Reconciliation reserve	1	17,650	98%	18,511	96%
Deferred tax asset	3	258	1%	654	3%
		18,033	**100%**	**19,290**	**100%**

E2. Solvency Capital Requirement (SCR) & Minimum Capital Requirement (MCR)

The SCR of the Company as at 30 June 2020 was £12,507k (2019: £14,988k). The MCR of the Company as at 30 June 2020 was £4,123k (2019: £3,747k). The SCR and MCR of the Group are not materially different to that of the Company. The final amount of the SCR in respect of the Company and the Group remains subject to supervisory assessment.

<u>Solvency Capital Requirement</u>

The Company uses the Standard Formula approach for calculating its regulatory SCR, although it maintains its own internal view of capital. The following table shows the breakdown of the Company SCR by risk. In line with the construction of the Standard Formula SCR, the amounts for each risk module contain some diversification allowance within that module. For example, the market risk line includes diversification between property and spread risk.

The composition of the Company SCR is set out the following table:

SOLVENCY CAPITAL REQUIREMENT	30 June 2020 £'000	30 June 2019 £'000
Market risks	3,641	4,033
Counterparty risks	1,668	1,827
Non-life underwriting risks	7,601	8,723
Basic SCR diversification	(2,743)	(3,054)
Operational risks	2,340	3,459
Total	**12,507**	**14,988**

The Company has not utilised simplified calculations in applying the standard model and there has been no use of undertaking specific parameters in the non-life underwriting risk calculations.

Minimum Risk Capital Requirement
The MCR IS calculated in accordance with article 248 of the delegated regulations with the key inputs into the calculation being the net of reinsurance technical provisions and gross written premium over the reporting period.

Material Changes in the SCR and MCR
The risk profile of the Company has reduced during the year ended 30 June 2020 as the Company's closed UK and Greek Motor books continue to run-off and as a result of the decision to terminate the new business arrangements with many of the Company's MGA partners.

The increase in the MCR is due to the MCR calculation being more sensitive to the level of net retained reserves, which have increased due to the reserve strengthening in the retained portfolios.

E3. Non-Compliance with the MCR and Non-Compliance with the SCR

The Company has maintained capital sufficient to meet its minimum capital requirement and solvency capital requirement throughout the period covered by this report.

E4. Any Other Information

The Directors do not consider that there is any further information which should be disclosed regarding the capital management of the Company.
